Więc Więc if I'm doing something wrong/stupid. But I have

problems with the use of some cheats I found and I would like to know if anyone can help me please. I use these cheats: github.com [Max Gold] D3000000 14000000 009997D0 000F423F [Max Renown] D3000000 14000000 009997D4 000F423F [Second Seal] D3000000 00 14000000 009B8B6E 000000FF [Master Seal] 009B8B6C 000000FF D3000000 14000000 [Master Key] D3000000 1400000000 This file has been shortened. show the original I was actually able to put them in the cheats-thingie panel. However, when you actually activate them in the panel, they do not work in the game. Please help. Otakusan94: these cheats are for the US version of the game, is that the version of the game as well? Yes I am. I made sure to check several times I used the appropriate versions. Try to add one by one, for example, go in the game when you are able to see how much gold you have, open the codes tab and remove all the codes, then click on Add Cheat, put the name [Max Gold] without spaces and on the second text file called Code paste code. ie: D3000000 14000000 009997D0 000F423F as yes. then enable the scam. should work, but remember that not every scam works out. Hi I apologize in advance for my English. On dbf, fire emblem awaening, bravely by default.... I do all the posible cheat but none is activated, is there another way to implement them? are you sure you have codes for you region games and version updates? Yes, codes are accepted but do not activate, even download the US version to test the hello cheat all! I'm new to citra and I play Fire Emblem Fates (EU) guys know some codes I can use? You can get the codes from hear.
